

# A PLUS™

## Tall Fescue and Kentucky Bluegrass

**Fine Texture**

**Drought Tolerance**

**Traffic Tolerance**

**Disease Resistance**

**Excellent leaf texture and turf density with resistance to many common turf diseases for better turf quality.**

A Plus provides all of the outstanding characteristics of our Triple-A Tall Fescue Blend with a “plus” of improved sod-forming characteristics and recuperative potential by combining three top performing Tall Fescues with a high grade Kentucky Bluegrass which is able to maintain a denser and finer textured turf by being able to creep into voids caused by divots or excessive wear.

### Technical Information

#### Applications

A Plus is an excellent selection for use in sun or partial shade for home lawns, parks, athletic fields, and golf course roughs. Superior Salt and Drought Tolerance make A Plus an excellent selection for areas frequently suffering winter damage or those hard to irrigate locations. A mowing height of 1.5” to 3” and an ability to maintain turf density throughout the season in high traffic high stress areas allow this turf to be utilized for numerous applications in northern and transition zone environments, maintaining beautiful genetic color even throughout the winter months.

#### Specifications

Seeding and establishment may be done in spring or fall, but be wary of summer or winter annuals. For better early weed control, consider an application of Mesotrione in the seeding process. Plant seeds to a depth of no more than 0.25” below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed, keep seedbed moist throughout germination, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 10 to 21 days and be complete within 35 days. Remember, the full turfgrass establishment process may take 6 months to a year.

**SUPERIOR  
WEAR  
TOLERANCE**

#### Maintenance

Seeding Rate: 6-8 lbs./M\*

Mowing (Recommendation): 1.5-3.0”

Mowing (Down to): 0.750”

\*M=1,000 square feet
