

# ATHLETIC PRO II™

## Kentucky Bluegrass & Perennial Ryegrass Mixture

Superior turf performance for athletic fields with limited maintenance budgets.

A durable combination creating great wear tolerance, vigorous recuperative ability, broad disease resistance and excellent winter hardiness makes Athletic Pro II a great selection for those hard to manage areas and limited budget fields. Great spring green-up, transition zone adaptation and insect resistance give maintenance managers peace of mind in high stress and high demand environments.

### Key features

- Quick germination and establishment
- Excellent seedling vigor
- Dark genetic color

**Excellent Turf Quality**

**Disease Resistant**

**Excellent Winter Hardiness**

### Technical Information

#### Applications

Athletic Pro II is tailored to athletic fields, playgrounds, golf course roughs, or other high traffic areas that receive less-than-optimal maintenance, where superior quality and long-term durability are desired. Athletic Pro II performs well at 1.5-3 inch (40-75 mm) mowing heights and should be maintained above 2 inches (5 cm) under restricted moisture and fertility programs.

#### Specifications

Seeding and establishment may be done in spring or fall, but be wary of summer or winter annuals. For better early weed control, consider an application of Mesotrione in the seeding process. Plant seeds to a depth of no more than 0.25-0.50" below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed, keep seedbed moist throughout germination, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 10 to 21 days and be complete within 35 days. Remember, the full turfgrass establishment process may take 6 months to a year.

**EXCELLENT  
TRAFFIC  
TOLERANCE**

#### Maintenance

Mowing (Recommendation)	1.5-3"
Mowing (Down to)	2"
Seeding Rate:	4-6lbs./M*
	175-225lbs/acre

\*M=1,000 square feet
