

BARRARI™

Kentucky Bluegrass

Barrari™ is named after the famous Italian sports car. Why? Because Barrari seed is exceptionally quick to germinate and establish all while providing a luxurious stand of grass.

Those who know Kentucky bluegrass, absolutely love Barrari, because its quick start and establishment characteristics allowing growers to extend their seeding window later into the fall. Barrari also is a component of Barenbrug's renowned HGT® blend.

Key features

- Extremely quick establishment
- Extend your Fall seeding
- Component in Barenbrug's premium HGT Kentucky bluegrass blend

Close Mowing

Fine Leaf Texture

Drought Tolerant

Technical Information

Applications

Barrari is an excellent selection as a straight, blend, and sod. It is sure to give your golf course, sports field, park or home lawn the boost you're looking for. Its low mowing tolerance allows it to excel in fairways, tee boxes, or other areas where mowing below 1" is required. As a component of HGT, Barrari has proven it can stand up to drought and provide quality turfgrass in the most stressful of situations.

Specifications

Seeding and establishment may be done in spring or fall, but be wary of summer or winter annuals. For better early weed control, consider an application of Mesotrione in the seeding process. Plant seeds to a depth of no more than 0.25-0.50" below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed, keep seedbed moist throughout germination, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 10 to 21 days and be complete within 35 days. Remember, the full turfgrass establishment process may take 6 months to a year.

Maintenance

Seeding Rate: 2-3lbs/M*
Mowing (Recommendation) 2-3"
Mowing (Down to) 0.500"
*M=1,000 square feet
