

BLUE GENES™

Kentucky Bluegrass

A superior combination of Kentucky Bluegrass that delivers turf high quality performance on and off the sports field.

From Jacklin's bluegrass breeding program, Blue Genes combines several KBG varieties to create this high performer. Characteristics include outstanding disease resistance, a dark genetic color, and superior heat and traffic tolerance give you ease of mind in those high stress and high demand areas.

Key features

- Outstanding Resistance to Summer Patch, Dollar Spot, and Leaf Spot
- Excellent Spring Density to Crowd Out Weeds
- Widely Adapted for Heat and Cold Tolerance
- Dark Genetic Color

Resists Poa annua

Good Heat Tolerance

Excellent Turf Quality

Technical Information

Applications

Blue Genes is an elite combination of Kentucky Bluegrass which adapts to many different locations and uses including golf course tees, fairways or rough, athletic fields, parks or home lawns. It's tight knitting habit, exceptional disease resistance and adaptability allow for a dense canopy crowding out Poa Annua and weeds, helping keep a desirable stand with minimal inputs. A dark genetic color will ensure that your turf stands out among the best. Blue Genes will perform well with mowing heights from .5 in. and up, but performs best at mowing heights of .5 in. to 2in

Specifications

Seeding and establishment may be done in spring or fall, but be wary of summer or winter annuals. For better early weed control, consider an application of Mesotrione in the seeding process. Plant seeds to a depth of no more than 0.25-0.50" below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed, keep seedbed moist throughout germination, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 10 to 21 days and be complete within 35 days. Remember, the full turfgrass establishment process may take 6 months to a year.

**CROWDS
OUT POA
ANNUA**

Maintenance

Mowing (Recommendation)	1-2"
Mowing (Down to)	0.500"
Seeding Rate:	2-3lbs/M*

*M=1,000 square feet
