

MED GOLD™

3-Way Perennial Ryegrass Blend

Fast Establishment

Disease Resistance

Dark Color

Med Gold perennial ryegrass blend combines our best perennial ryegrasses formulated for both permanent northern turf and southern dormant bermudagrass overseeding.

The varieties selected for this blend show improved seedling vigor and exhibit overall tolerance to common diseases and pests in turf. On permanent turf, Med Gold is used for rejuvenating thin, heavily trafficked or diseased turf, or where rapid turf replacement is necessary. When overseeded into dormant bermudagrass Med Gold produces both an excellent playing surface for sports and a great looking lawn for home and commercial landscapes.

Key features

- Improved insect and disease resistance
- Superior density in closely mown turf
- Exceptional dark-green color
- Great choice for permanent turf areas or winter overseeding

Technical Information

Applications

Med Gold is particularly suited to golf course and athletic field turf because of its excellent tolerance to traffic, compacted soil, low clipping heights, and its ability to establish rapidly. Med Gold tolerates medium to high maintenance in full sun to partial shade.

Specifications

Seeding and establishment may be done in spring or fall but be wary of summer or winter annuals. Plant seeds to a depth of no more than 0.25-0.50" below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed keep the seedbed moist throughout the germination process, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 5 to 7 days and be complete within 14 days. The stand should achieve high levels of percent cover by 21 days. Remember, the turfgrass establishment process may take 6 months to a year.

Maintenance

Permanent Turf

New establishment:	200-300lbs/ac (225-340kg/ha)
Interseeding for sites with 20-50% cover:	175-200lbs/ac (200-225kg/ha)
Interseeding for sites with 50-75% cover:	100-175lbs/ac (115-200kg/ha)

Dormant Bermudagrass Overseeding

Athletic Fields and Landscapes:	7-20lbs/1,000ft ² (35-100g/m ²)
Greens:	10-40lbs/1,000ft ² (11-45kg/ha)
Fairways:	200-500lbs/ac (225-565kg/ha)
