

PREMIER III™

Perennial Ryegrass

Superior Traffic Tolerance

Quick Germination

Great Spring Green Up

Premier III turf-type perennial ryegrass has a great dark green color with very fine texture and is quick spring green-up. It forms a dense turf and displays great adaptability to a wide range of soil conditions.

Premier III is highly rated in NTEP Perennial Ryegrass Trials for seedling vigor, turf quality, percent living cover, spring green up, traffic tolerance, and low mowing quality.

Key features

- Dark color
- Excellent low mowing quality
- High turf density
- Great for overseeding
- Good disease resistance

**VERY
FINE
TEXTURE**

Maintenance

Warm Overseed: 20-25 lbs./M*

Cool Interseed: 4-5 lbs./M*

New Stand of Turf: 8-10 lbs./M*

*M=1,000 square feet

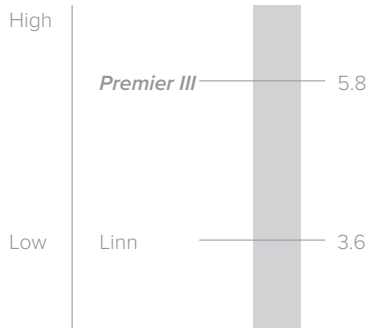

Technical Information

Applications

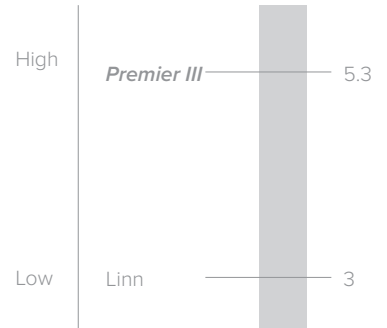

Premier III excels in warm-season areas and is a well-rounded grass that is quick to establish thanks to its strong seedling vigor. Premier III is well suited for use on golf course tees, fairways, and roughs. Its adaptability also makes it a great choice for sports fields, parks, and home lawns. Premier III exhibits a beautiful dark green color and displays strong winter color in temperate climates. It is also one of the earliest perennials to green-up in the spring. Premier III is ideally suited as a fall over-seed for warm-season turf, but it is equipped to perform in many perennial ryegrass uses and areas with a broad range of adaptability.
