

TRANSCONTINENTAL™

Bermudagrass

Quick Establishment

Summer Turf Quality

Improved Cold Tolerance

Transcontinental was developed in North Carolina to exhibit improved cold tolerance.

Very uniform leaf texture, with excellent turf density, Transcontinental will establish very quickly making it an ideal choice for a variety of applications including home lawns, sports fields and golf fairways. Transcontinental is featured in PanAm.

Key features

- Superior wear tolerance
- Seeding vigor
- Spring greenup
- Winter hardiness

Technical Information

Applications

Transcontinental is excellent on golf courses, sports fields, parks and home lawns. Its great turf quality and improved cold tolerance expand the use of Transcontinental from southern regions up into the transition zone. This fast establishing variety comes with uniform leaf texture and great turf density. Transcontinental can be used as a straight variety or in a blend such as our PanAm Blend.
