

XANADU™

Tall Fescue

Xanadu™ tall fescue offers a winning combination of beauty and toughness, with fine texture, dark color, and excellent resistance to environmental stressors like disease, drought, and traffic.

Xanadu tall fescue was developed for improved leaf texture, dark color, improved density, and resistance to brown patch disease. Xanadu's excellent turf quality is demonstrated in multiple regions of the US in the 2018 NTEP, including the Southeast, Mountain West, Northwest, and Transition Zone. Xanadu is also earning impressive ratings for performance under shade and drought conditions.

A-List Certified

Xanadu is currently certified with the Alliance for Low Input Sustainable Turf. To learn more about A-List and the certification process visit their website at: a-listturf.org

Maintenance

Seeding Rate: 6-10lbs/M*
 Mowing (Recommendation) 1.5-3"
 Mowing (Down to) 1"
 *M=1,000 square feet

Technical Information

Applications

This do-it-all tall fescue will transform your turf into a lush, green paradise. For use in sun or partial shade, Xanadu is an excellent choice for home lawns, parks or athletic fields, golf course roughs or out of play areas and other community green areas.

Specifications

Seeding and establishment may be done in spring or fall, but be weary of summer or winter annuals. For better early weed control, consider an application of Me-sotrione in the seeding process. Plant seeds to a depth of no more than 0.25-0.50" below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed, keep seedbed moist throughout germination, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 7 to 14 days and be complete within 21 days. The stand should establish in 30 days. Remember, the full turfgrass establishment process may take 6 months to a year.
